

Garden furniture case study

Assembly packing services

Customer profile

A well established high street retailer, selling clothes, accessories and homeware products.

Challenge

MCR Services received a container shipment of garden chairs direct from China.

Like a lot of items shipped overseas, the most cost-effective method for the garden chairs to arrive to the UK was stacked, in bulk, inside a container.

Solution

Our client's requirements meant that all chairs had to be individually boxed, ready for online retail service distribution direct to the end user.

MCR Services de-stacked, quality checked and packaged the chairs securely into cardboard boxes, finished by adding the barcode sticker.

The boxed chairs were then transported to the client's warehouse using our neighbouring transport company.
